

SUBWAY EVACUATION PROCEDURES

If an emergency occurs, follow these simple steps:

- 1** Listen for announcements. Follow the instructions of TTC employees and emergency response personnel. Remain calm.

- 2** Leave large objects behind, this includes parcels, bicycles, strollers and other wheeled devices.

- 3** Help those who need it. During the evacuation, help children, and people who are elderly or disabled.

- 4** The train crew will direct you through the cars of the train and out to an emergency exit. Be alert for tripping hazards.

- 5** If evacuation through the train is not possible, use the Emergency Door Opening Device located above the door behind the operator's cab or every door in the SRT.
